

Intel® NetStructure™ 7370 Application Shaper

Deliver secure, measured application services

KEY FEATURES

- **Defines application performance and conditions traffic**
- **Supports Application Service Level Agreements (ASLAs)**

Develop a comprehensive approach to application provisioning and service-level management with the Intel® NetStructure™ 7370 Application Shaper. This policy-based application subscriber management system enables you to deliver timely new services and integrate existing ones.

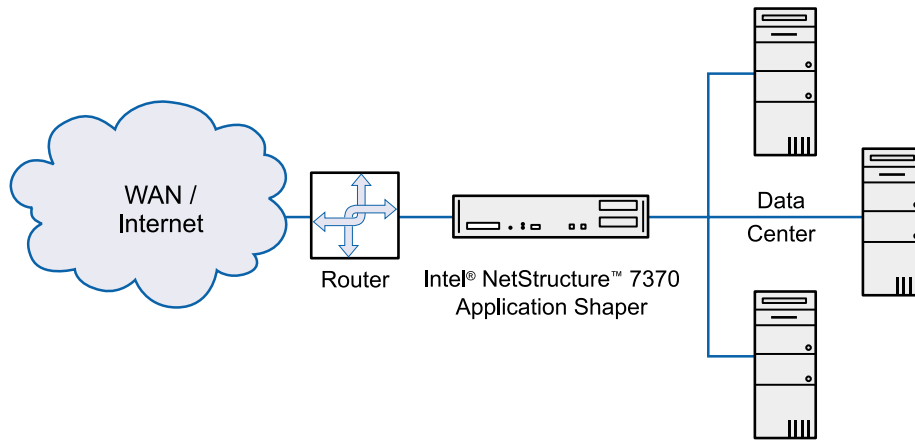

The Intel NetStructure 7370 Application Shaper enables critical applications and paces less urgent ones so performance meets Application Service Level Agreements (ASLAs). Per-application, policy-based bandwidth allocation and traffic conditioning allows you to monitor, measure and track application and network performance. The service point of demarcation defines responsibility limits between you and your customers. Once application and subscriber-specific usage data is collected, the Intel NetStructure 7370 Application Shaper defines, enforces and validates ASLAs; provides performance analysis and integrates billing.

Features

Benefits

Service point of demarcation	■ Decreases time spent on diagnosing issues outside the service providers' control
Performance analysis	■ Identifies application behavior and validates the quality of deliverables for both the service provider and the customer
Service-level management	■ Delivers per-application SLA definition, enforcement and compliance validation
Application-based billing and performance	■ Integrates through third parties which facilitates tailoring charges to match services
Integrates with existing network configurations	■ Requires no new protocols, reconfigurations or topology changes
Web-based user interface	■ Configures, controls and monitors SLAs, application performance and policies from anywhere with a standard web browser
Optional support packages through Intel® NetStructure™ Support Services	■ Additional product coverage worldwide for maximum system uptime

SPECIFICATIONS		Intel® NetStructure™ 7370 Application Shaper
PERFORMANCE ANALYSIS		<ul style="list-style-type: none"> Application response times, network efficiency Troubleshooting tools, intuitive graphs, reports
LIMITS AND BOUNDARIES		<ul style="list-style-type: none"> Maximum partitions: 256
INTEROPERABILITY FEATURES		<ul style="list-style-type: none"> XML, DiffServ, IP COS, TOS, LDAP, SNMP, event-based traps HP OpenView* and PolicyXpert, Micromuse Netcool*, InfoVista and other third-party reporting vendors
MANAGED LINK SPEED		<ul style="list-style-type: none"> One T3/E3 up to 45Mbps
DEVICE MANAGEMENT		<ul style="list-style-type: none"> DB-9 console port PolicyConsole web-browser interface Telnet command line interface SNMP MIB and MIB-II support
INTERFACE CONNECTIONS		<ul style="list-style-type: none"> Console port: RS-232 (AT-compatible) with male DB-9 connectors Network interface: 10/100Mbps Ethernet 2 PCI expansion slots for future hardware-assisted features
PHYSICAL SPECIFICATIONS		<ul style="list-style-type: none"> Standard 19in rack-mount
Dimensions (W x H x D)		17.2 x 3.5 x 13.75in
